ABOUT THIS REPORT

關於本報告

ESG Management Approach and Strategies

Identifying the materiality of different ESG aspects is critical to the formulation of the Group's overall ESG management approach and strategies. With the aim to better understand the views of different stakeholders on the Group, we have engaged a third-party organization to conduct survey among the Directors, staff, suppliers and customers. In addition to the materiality assessment, the survey also opened up a channel for both internal and external stakeholders to provide feedback on the sustainability aspects of the Ming Fai Group. Apart from stakeholder engagement, the Directors also reflected on the prioritization of different ESG risks, taking into account the factors including past operating experience, industry trends and cost analysis.

The results of the materiality assessment indicate that "Anti-corruption", "Product Responsibility" and "Health and Safety" are the three most material ESG aspects of the Group. In order to address these three identified aspects and the associated risks, the Board will take appropriate actions to continuously improve the ESG performance of the Group and disclose the relevant information in the report annually.

How to review progress against our targets

We recognize that the setting of performance targets can facilitate guidance by the management and hence improve the ESG performance of the Group. We actively consider setting quantitative targets for the Group in terms of key performance indicators such as total emissions, waste generation and energy and water efficiency. Prior to the setting of quantitative targets, the Group will closely monitor and develop appropriate management systems for each aspect of high materiality. While the Board considers the ESG work for the coming year will be challenging in light of various external factors, such as the global economic slowdown and tight supply chains, we remain confident that the Group's ESG strategies and targets can be successfully achieved with the cooperation of each functional unit of the Group.

環境、社會及管治管理方針及策略

識別不同環境、社會及管治層面的重要性對本集團訂立整體環境、社會及管治管理方針及策略非常關鍵。為更準確地了解不同持份者對本集團的意見，我們委託了第三方機構向董事、員工、供應商及顧客進行問卷調查。問卷調查除了重要性評估外，亦提供一個渠道予內外持份者反饋他們對明輝集團在可持續發展方面的各種看法。在持份者參與的同時，董事亦反映出不同環境、社會及管治風險的優先排序，當中的考慮因素包含了過往經營經驗、行業趨向及成本分析等。

重要性評估的結果反映，「反貪污」、「產品責任」及「健康與安全」為本集團最重要的三個環境、社會及管治層面。針對這三個識別出的層面及相關風險，董事會將採取相應舉措，持續提升本集團的環境、社會及管治績效，並在年度報告披露。

如何檢討目標進度

我們明白訂立績效目標有助於管理層指導以致提升本集團的環境、社會及管治表現。針對排放物總量、廢棄物產生量及耗能耗水效益等關鍵績效指標，我們積極考慮為本集團制定量化目標。在量化目標確立之前，本集團將就各項高重要性的層面密切監察及建立適當的管理系統。綜觀不同外在因素（如環球經濟放緩及供應鏈緊張），董事會認為來年的環境、社會及管治工作充滿挑戰，但我們仍相信本集團的環境、社會及管治策略及目標能在本集團各功能單位配合下順利達成。

The Group will consider expanding or extending the use of solar energy and other renewable energy sources for power generation at each of our production bases where appropriate and feasible, and phasing out energy-intensive equipment to reduce the use of non-renewable energy and greenhouse gas emissions, to achieve the target of gradually improving energy consumption performance.

CLIMATE CHANGE

Global warming has brought about extreme weather situations in various parts of the world. The Group's production bases in the PRC and Hong Kong are exposed to the risks of typhoons and rainstorms, and the production base in Cambodia is under the threat of flooding during the rainy season, such weather issues may pose safety risks and economic losses to the Group. Therefore, safety measures such as reinforcement of overhead facilities, windows and doors, and relocation of production materials and finished products away from windows are taken before a typhoon signal is hosted. The structure of our plants has been continuously strengthened to provide higher resistance against super typhoons. The Group also keeps the waterways of its production bases clear of blockages and ensures pipelines deepening and installation are completed before the expansion of our plants to avoid water accumulation during the rainy season.

In addition, given the rising global awareness on the issues of climate change and carbon reduction, together with the PRC's goal to realize carbon neutrality by 2060, subsequent to which relevant regulations and more stringent policies (such as the implementation of carbon pricing mechanism, or the requirement of switching to renewable energy, etc.) will be implemented in various regions, which may increase the Group's operating costs. Besides, our hotel customers will also need to comply with the relevant requirements and switch to low-carbon products. The Group will continue to actively develop relevant products in response to market demand and enhance staff training and promotion to abide by the new regulations and policies in the future.

氣候變化

全球暖化為各地帶來極端天氣情況。本集團於中國與香港的生產基地面對颱風及暴雨威脅，以及柬埔寨之生產基地面對雨季淹水威脅，有機會為本集團造成安全風險和經濟損失。因此，我們會於懸掛颱風信號前採取安全加固措施，如加固高空設施、門窗等，以及把生產原料及成品移至遠離窗邊位置，並持續強化廠房結構，使其更能抵禦超強颱風。本集團亦時常暢通生產基地之水道以防堵塞，並在擴建廠房前挖深和安裝排水管道，避免雨季積水。

此外，由於全球更關注氣候變化與減少碳排放之議題，以及中國已訂立目標於2060年前實現碳中和，隨後各地將會實施相關法規及更嚴格的政策（例如實施碳價格機制、或需改用可再生能源等），有機會讓本集團之經營成本增加。除此之外，本集團之酒店客戶亦需符合相關要求而轉向低碳產品，本集團將持續積極開發相關產品配合市場需求，並加強員工教育與宣傳，以配合未來的新法規及政策。
